## NCERT Exemplar Solutions For Class 10 Maths Chapter 1-Real Numbers

EXERCISE 1.1 PAGE NO: 2

Choose the correct answer from the given four options in the following questions: 1. For some integer m, every even integer is of the form: (B) m + 1

(A) m (C) 2m

(D) 2m+1Solution:

(C)2m

Explanation:

Even integers are those integers which are divisible by 2.

Hence, we can say that every integer which is a multiple of 2 must be an even integer.

Therefore, let us conclude that,

for an integer 'm', every even integer must be of the form

 $2 \times m = 2m$ .

Hence, option (C) is the correct answer.

2. For some integer q, every odd integer is of the form

(B) q +1 (A) q (C) 2g (D) 2q + 1

Solution:

(D) 2q+1

Explanation:

Odd integers are those integers which are not divisible by 2.

Hence, we can say that every integer which is a multiple of 2 must be an even integer, while I

added to every integer which is multiplied by 2 is an odd integer.

Therefore, let us conclude that, for an integer 'q', every odd integer must be of the form

 $(2 \times q)+1 = 2q+1$ .

Hence, option (D) is the correct answer.

3.  $n^2 - 1$  is divisible by 8, if n is

(A) an integer

(B) a natural number (C) an odd integer (D) an even integer

Solution:

(C) an odd integer

Explanation:

Let  $x = n^2 - 1$ In the above equation, n can be either even or odd.

Let us assume that n= even.

So, when n = even i.e., n = 2k, where k is an integer,

We get,

 $\Rightarrow x = (2k)^2 - 1$  $\Rightarrow x = 4k^2 - 1$

From exercises designed to teach the youngest basic arithmetic students to more advanced games that perfect the skills of junior high and high school students, online math games give children at all levels of degree the fun tools they need to improve their mathematical skills. Undoubtedly, Exam requires rigorous preparation and commitment, but the right amount of hard work and consistent practice can help you go as planned to achieve your goals. These sections contain appropriate sums and derivations that cover almost all chapters. All questions in Section A are objective type issues of 1 mark each, these issues are based on the basic knowledge of the chapter and require a precise answer at the point. In addition, you can also do practice tests and simulate document tests published from a reliable source. Solving these questions documents will help you at your current level of preparation and will improve your performance on the board exam. When they answer an incorrect question, a red X appears.
